

**Question 2: The Unix Command Line**

*1. List all the files in the current directory that have a three letter file extension of which we only care that the last 2 letters of the file extension are “oc”.*

```
$ ls -a *.?oc
```

*2. Finger all the currently logged in users who have the string “Bob” or “bob” in their name.*

```
$ finger | grep 'Bob\|bob'
```

*3. ...Write all the above command-line commands without moving away from your home directory.*

```
$ mkdir -p Source/{Backup,Docs}
```

```
$ cp *.doc Source/Docs ; cp *.java Source/Backup
```
